

# UNICA *is for those* *who* LOOK

the world with the excitement of the first time, for those who are not satisfied with things they have already seen, for the black swans and for those who are still capable of unexpected feelings, **for anyone who can feel their own talent** and is **willing to fight for beauty**, for those who believe in grace and know how to capture the strength and the fragility of **being unique and unrepeatable.**

*Vanessa Stella*

**Artistic creation** in its most sublime form should be able to translate aesthetic expression into subtle language, capable **of communicating with the inner soul of humans** even touching their most sensitive and profound chords. UNICA pursues the idea of art able to blend aesthetic amazement, functionality and emotional well-being.

To obtain the results we established **each of our works gets its inspiration and material** from **natural elements** and the harmonious relationship that they create with everything that surrounds them.

In our works, through attentive processes that blend the most ancient knowledge of tradition with the most innovative techniques for processing precious materials, the spark of gold powder encounters the transparency of glass, the polished reflection of metal and the robust strength of wood to grasp the light and be able to return it to the spaces in a dance of reflections that requires care and the possibility **of feelings well beyond the immediate view.**

# Vanessa Stella Fabrizio Rocchi

According to the **theory of encounters**, two people, when they come in contact for the first time, they do it with a certain part of the body that they already know and together determine the meaning of that relationship.

According to the theory of encounters, when two people come in contact through their eyes, for what they represent, their finding each other will be the sprout of an attentive correspondence, oriented to maintain the hygiene of the eternal balance between the intimacy of the deep and the beauty of the day.
