

*Luxury Bespoke Tables*

**UNICA is for those who look**

at the things of the world with the amazement of the first time, for those who are not satisfied with the already seen, for the black swans, for black sheep, for those who are still capable of unexpected emotions, for those who know how to listen to their inclination and are willing to fight for the sake of beauty, for those who believe in gracefulness and **know how to accept** the strength and frailty of **his unique and unrepeatable being.**

According to encounter theory, two people, when they first come into contact, do so with a certain part of the body that they already know and together determines the meaning of that relationship.

**UNICA** arises from the encounter of two similar souls who firstly crossed the eyes and then, giving the lucidity and fortitude to the heartfelt vocation of the other, have merged into a shared vision that, **with love, and through the way of art, pursues splendour in everyday life.**

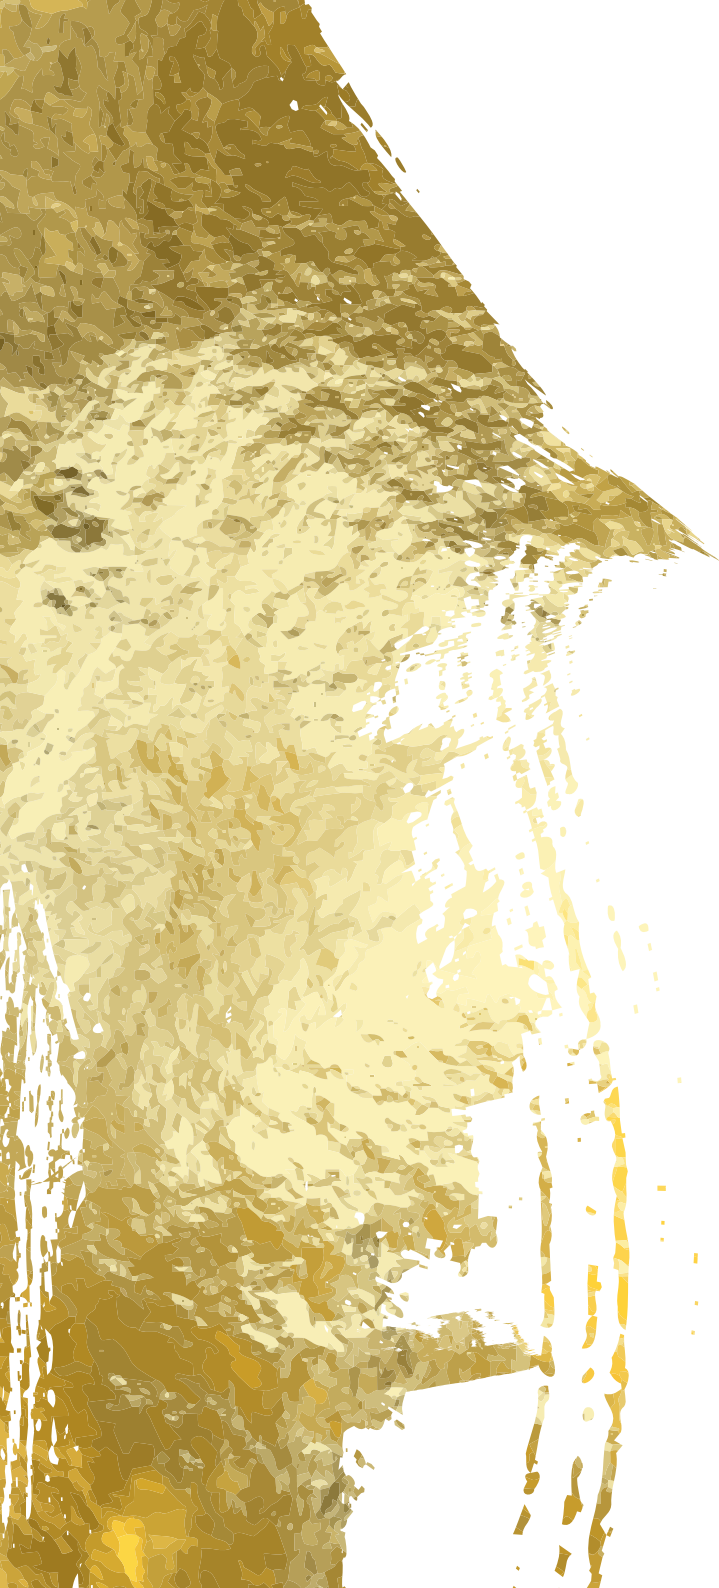

**Artistic creation**, in its most sublime declination, **should be able to** translate aesthetic manifestation into subtle language, capable of **communicating with the inner reality of human being** up to touch its most sensitive and deepest strings.

**UNICA** pursues the ideal of an art capable of combining aesthetic astonishment, functionality and poignant well-being.

In order to achieve the results that we have set ourselves, **each of our works draw inspiration and material from the natural elements** and the harmonious connection that they establish with everything around them.

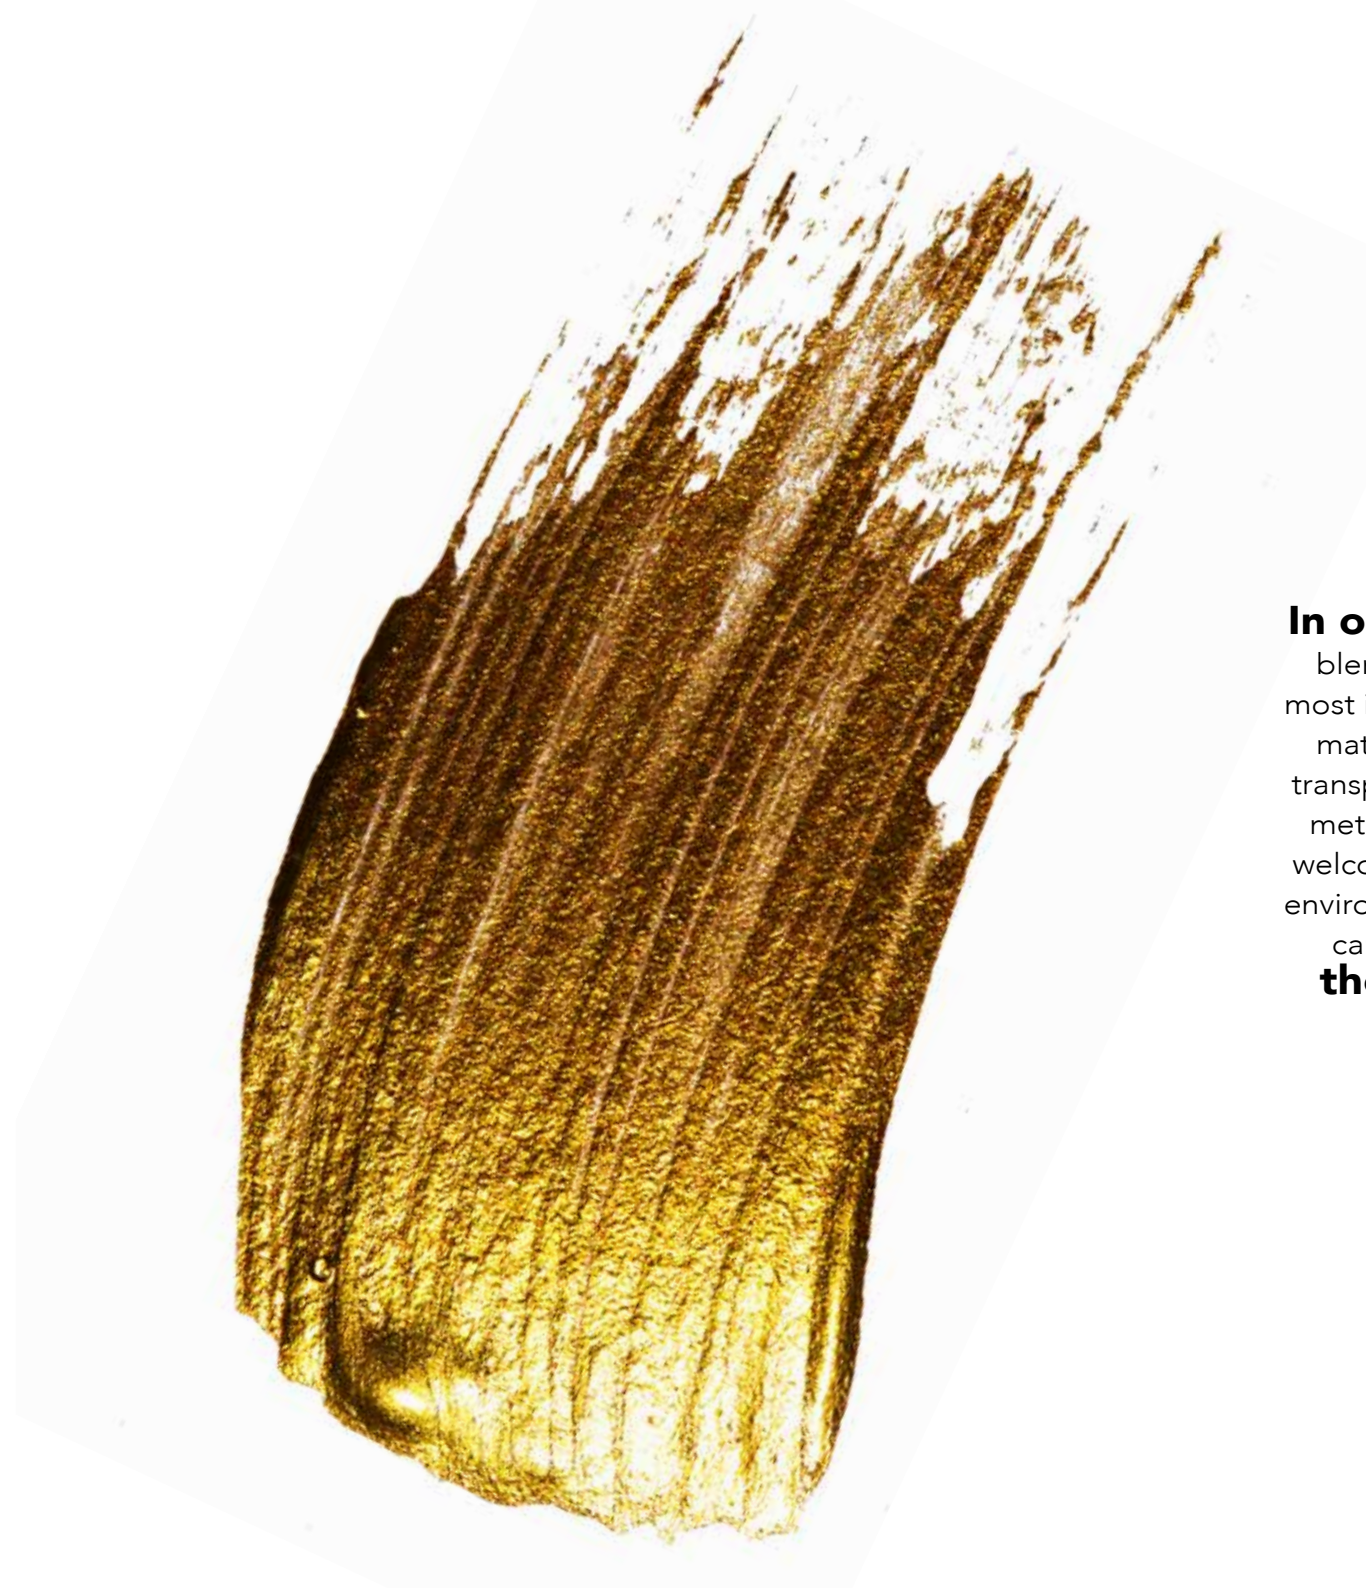

Through partnership with artists, designers, artisans, masters of light, poets and researcher of the incorporeal, **we face a meticulous investigation on shapes and materials** with special emphasis to their harmonious, symbolic and essential characteristics.

Ancient peoples identified gold with the deity who represented the sun and, as such, they considered it a source of truth and enlightenment.

**In our pieces**, through careful processes that blend the oldest wisdoms of tradition with the most innovative techniques of processing precious materials, the shimmer of gold dust meets the transparencies of glass, the smooth reflectance of metals and the sturdy timber of wood to better welcome light and then be able to return it to the environments in a dance of reflections that asks for care and possibility **of emotion far beyond the immediacy of the apparent.**
