

COLLECTION
NASTRI™
FOR ROUND TABLES

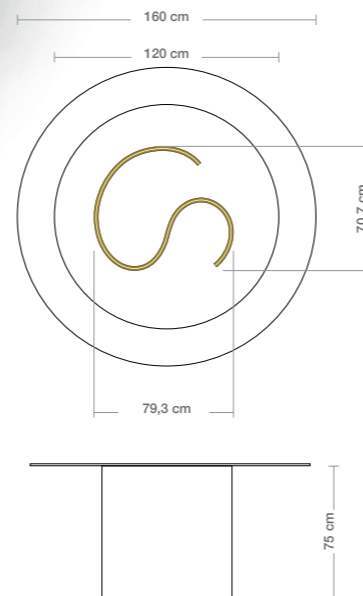

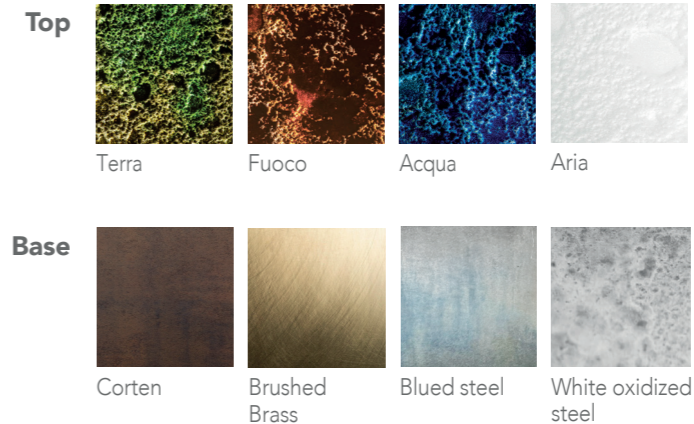

Designers UNICA - Vanessa Stella

Product features Tables with fused glass top (vetro cotto), crafted through high-temperature processing to achieve a dense, non-transparent surface with iridescent, shifting colour tones. The surface features slight material irregularities that enhance its natural character and interaction with light. Each top is unique, with chromatic variations inspired by the four elements (Earth, Fire, Water and Air) created through layered pigments, oxidation effects and controlled thermal reactions. Edges are bevelled; thickness is primarily 15 mm, with natural variations due to the fused glass process.

Structure Steel structure, 3 mm thickness, laser-cut and calendered. Available finishes: Corten, Brushed Brass, Blued Steel and White oxidized steel, designed to harmonize with the glass.

Each piece is a material interpretation of nature in transformation, where matter, light and colour interact in dynamic balance.

Round tables dimensions from Ø. (120 to 160) cm - H. 75 cm
